

Built for the campus you're *actually* *building*.

Electron Metal's response to Nokia's 48RU cabinet RFQ, engineered against the real scale, cooling requirements, and construction timeline of the new Kanata North innovation campus. Not a generic spec sheet.

AI-Powered Networks

Data Center Networking

Quantum-Safe Infrastructure

6G Research

This response was built after studying Nokia's own newsroom release, construction partner disclosures, and industry coverage of the campus, so every number on this page, and every spec in our offer, is matched to the project you're actually delivering.

RESEARCH BRIEF

More than a building.

Canada's next digital infrastructure anchor.

LOCATION & SCALE

Kanata North Tech Park, Ottawa. **750,000 sq ft** total: 450,000 sq ft of lab space, 300,000 sq ft of workplace. Designed by Gensler, built by Broccolini.

RESEARCH FOCUS

AI-powered networks, data center networking, quantum-safe infrastructure, 6G pre-standard research, 800G optical transport and IP routing.

GOVERNMENT PARTNERSHIP

Backed by the **Strategic Innovation Fund** (Government of Canada), the Government of Ontario, and the City of Ottawa.

STRATEGIC ALLIANCES

An **NVIDIA** partnership and leading university programs feed the talent pipeline directly into the campus.

TALENT BASE

1,900+ R&D professionals in Ottawa, 2,500+ across Canada, building on 50+ years of Nokia presence in the region.

BUILT RESPONSIBLY

LEED design principles, low-carbon materials, and resilient renewable energy systems guide the build.

"Nokia's trusted, secure, and advanced networks are driving the AI supercycle."

JEFFREY MADDOX · PRESIDENT, NOKIA CANADA

"Ottawa is Canada's innovation capital."

MARK SUTCLIFFE · MAYOR OF OTTAWA

INCLUDED WITH THIS PRESENTATION

We didn't just quote your spec. *We built it.*

Alongside the written offer, Nokia's evaluators get a live, browser-based 3D review of the proposed cabinet, built specifically around your 25-line requirement document, not a generic product demo.

- **Zero install, zero login.** Opens in any browser from a link in our written offer.
- **Click-anywhere hotspots** identify any component with a spec card on demand.
- **Copy-to-clipboard configuration summary.** Nokia's committee can circulate exactly what they built internally.
- Nokia flagged two open questions, **seismic rating and door-cooler vendor**. Both are answered inside the tool. Our cabinets are **Zone 4 seismic certified**, so it isn't a gap on our side.

3d-configurator.electronmetal.ca/nokia-48ru

SEISMIC PROOF Zone 4 Certified Certification on file and viewable in the tool. Nothing pending, nothing conditional.	GUIDED TOUR 90-Second Walkthrough Structure, load ratings, EIA mounting, cable pathways, rear-door cooling, ganged-row scaling.	COVERAGE MATRIX 25 / 25 Requirement Lines Every line from Nokia's own doc, tagged Standard / Option / Compliant, clickable to 3D proof.	LIVE CONFIGURATOR Build Your Own Cabinet Toggle every optional line. Live 3D updates, exportable configuration summary.	LOAD TEST 3,000 lb Static Rating Rack units live against the rated load with a real-time weight counter.
--	---	---	---	--

Why this matters in round one: half of Nokia's requirement list is options still undecided. If the committee uses this tool to converge on a configuration, that configuration becomes the reference finalists price against in round two.

REQUIREMENT → RESPONSE

Two cooling paths. One cabinet. *Nothing improvised.*

Four floors. Zero room for a patchwork.

Nokia's own construction release confirms the lab floors will house **more than 2,800 four-post racks across four floors**, supporting **both in-line and back-of-rack cooling**, with room for future expansion.

"...2,800 four-post racks across four floors, accommodating both in-line and back-of-rack cooling..." · Broccolini construction release

One cabinet, every configuration your spec calls for.

Built against **all 25 lines** of Nokia's own requirement document. Every optional line configurable, not fixed.

- Vendor-agnostic RDHx provisions with native support for **both** cooling paths
- **Zone 4 seismic certified**, tested and certified, not seismic-ready
- Fully welded 14-gauge steel, configurable depth, 24–48RU

ZONE 4
SEISMIC

Our cabinets are truly seismic certified.

Zone 4 certified construction, verified by test, documentation included with the offer. Not "seismic-ready." Not pending. Not an open question.

WHAT ELSE WE BRING

Everything the row needs. *From one partner.*

This RFQ covers one cabinet family, but a build at Nokia's scale touches every layer of the row. Here's the rest of what Electron Metal manufactures in-house.

01

Containment / Systems

The part most facilities skip, and the one that cuts cooling cost the fastest.

HAC & CAC

Up to 30% Cooling Savings

Retrofit-Ready

RELEVANT AT THIS SCALE

02

Server / Network Racks & Cabinets

24-48RU · configurable depth · fully welded 14-gauge steel · CSA certified · Zone 4 seismic certified.

THIS RFQ

03

Vertical Cable Managers

Side-mount and center-mount configurations. Keeps the row clean, organized.

High-Density Rows

Tool-less UAC

ROW-READY

04

Accessories

Wall-mount enclosures, blanking panels, and edge / IDF accessories.

Wall Mount

Blanking Panels

COMPLETE THE ROW

At 2,800+ racks across four floors, containment isn't a footnote. It's where the next efficiency gain lives. Worth a conversation once round one is settled.

WHO YOU'D BE WORKING WITH

48 years in Québec.

Made in Canada.

A trusted manufacturer of high-quality racks, cabinets and containment systems. 100% Canadian-made, fabricated and shipped from our Laval, QC facility to major data centers across Canada and the US.

Client Customization

Bespoke designs engineered to exact specifications, standard or fully custom, built in-house.

Seamless Logistics

Local and global rollouts coordinated from our Laval facility, fabrication to final-site delivery.

Expert Team

Skilled engineers, designers, and fabricators with decades of precision manufacturing expertise.

Unwavering Support

Technical support at every project stage: consulting, installation, post-deployment service.
